Skills

R	10 yrs.
Python	5 yrs.
JavaScript	3 yrs.
Bash	10 yr.
SQL	4 yrs.
Matlab	4 yr.
Data Analysis	9 years
Data Engineering	5 yrs.
Data Visualization	7 years

Libraries

- Rstan, brms, JAGS, hBayesDM
- H2O, XGBoost, LightGBM
- tidymodels, caret, mlr
- TensorFlow, Keras, PyTorch, Scikit-learn
- tidyverse, data.table, dplyr

Tools/Frameworks

- Git, Terminal
- Docker
- CI/CD
- AWS
- ML OPS
- ETL

Experience

R Developer — 04/2022 - 01/2024
FlowBank

– Conducted in-depth analysis to classify customers using Bayesian inference, revealing distinct segments and patterns for data-driven decision-making and targeted strategies.

– Developed new internal tools for data analysts in the form of R packages, and provided training and support for their use.

– Designed and implemented a data warehouse solution for efficient data processing and orchestration, contributing to streamlined data engineering workflows.

– Led the development of a comprehensive ML-Ops infrastructure for the data science team, including Docker environments for Julia, R, and Python.

– Designed and maintained a Shiny server, allowing scalable data visualization dashboards in R and python for easy monitoring of key performance indicators.

Teaching Assistant in Biotatistics — 09/2020 - 01/2022
University of Geneva

– Helped during lectures on statistics for the graduate program and mentored students in their research projects, providing guidance on statistical analysis and data visualization.

– Created and shared freely available data workshops in R and Python.

PhD Candidate in Computational Neuroscience — 03/2020 - 01/2022
Lemanic Neuroscience Doctoral School

– Used various statistical methods to analyze large scale datasets: Hierarchical Bayesian modeling, Multivariate pattern analysis, and model-free reinforcement learning.

– Applied programming skills in R, python and MATLAB, along with proficiency in neuroimaging and computing software such as Nipype, FSL, AFNI, and SPM

– Implemented model-free reinforcement learning (Q-learning algorithm) to investigate the computational basis of choices.

– Processed terabytes raw DICOM data to BIDS format, creating analyzed and reproducible shareable data for large-scale longitudinal clinical trials (EEG/fMRI signals and blood samples).

– Collaborated with Caltech data engineers to implement ICA-based denoiseification for better identification of activation and artifact components infMRI.

Internship in Computational Neuroscience — 03/2019 - 03/2020
Geneva Neurocenter

– Contributed to the advancement of research methodologies by exploring the application of theory-driven modeling approaches to real-world datasets, under the guidance of Pr. Lebreton.
Engaged in rigorous model validation of various findings from existing literature using open-source data, assessing the efficacy of parameter recovery techniques.

Projects

See my github profile for a more comprehensive list of open source projects.

Co-President — We Data
R, Python, Rust, JavaScript

– We Data is an organization that shares knowledge on code in data science (Blog, YouTube channel), give workshops about statistics, and do coding demonstrations. We also organize the R-Lunches.

Volunteer Researcher — actif-traffiC
R, SQL, JavaScript

Education

Ph.D. Candidacy in Computational Neuroscience

03/2020 - 01/2022
Campus Biotech - Switzerland
Topic: Differential contributions of ventral striatum subregions to the motivational and hedonic components of the affective processing of reward. Supervised by Pr. Coppin & Pr. Sander

MSc in Neuroscience

09/2018 - 03/2020
University of Geneva - Switzerland
Thesis: Denoising of high resolution fMRI signal using tICA. Supervised by Pr. Pool

International Studies Program

09/2017 - 06/2018
Smith College - USA

BSc in Cognitive Science

09/2014 - 06/2017
University of Geneva - Switzerland
Thesis: Event-related potential evidence of auditory spatial attention towards aggressive vocalizations. Supervised by Pr. Burra.

Languages

French	Native
Spanish	Native
English	Fluent
German	B2

Technical Skills

- Data Sctuctures and Algorithms
- Machine Learning
- Linux System Administration
- Visualization for Scientific Data
- Bayesian Statitics

Extracurricular

- Top 2% on StackOverflow (2024)
- Top 25% on GitHub (2023)
- Global Fellow scholarship (2017)

– Helping to evaluate the implications of reverting to a 30 km/h speed limit through the analysis of public data from the Swiss Federal Statistical Office. The findings aim to offer valuable insights for potential policy considerations and decision-making processes in a measured and informative manner. Link to the app

Publications

Investigating the effect of liraglutide on self-reported liking and neural responses to food stimuli. Coppin, G., Munoz Tord, D., Pool, Cereghetti, D., Golay, A., Sander, D., & Pataky, Z. *Journal of Obesity* (2023) - Paper

Differential contributions of ventral striatum subregions to the motivational and hedonic components of the affective processing of reward. Pool, E. R., Munoz Tord, D. , Delplanque, S., Stussi, Y., Cereghetti, D., Vuilleumier, P., & Sander, D. *Journal of Neuroscience* (2022) - Paper

3D-printed pacifier-shaped mouthpiece for fMRI-compatible gustometers. Munoz Tord, D., Coppin, G., Pool, E. R., Mermoud, C., Pataky, Z., Sander, D., & Delplanque, S. *Eneuro* (2021) - Paper

Early spatial attention deployment towards aggressive voices. Burra, N., Kerzel, D., Munoz Tord, D., Grandjean, D., & Ceravolo, L. *Social Cognitive and Affective Neuroscience* (2019) - Paper
