

Senior R Developer

-  Geneva, Switzerland
-  david.munoztord@mailbox.org
-  david-munoztord.online
-  munozt0
-  david-munoz-tord

Skills

R	10 yrs.
Python	5 yrs.
Bash	7 yrs.
Docker	5 yrs.
AWS (ECS / EC2)	5 yrs.

Tools/Frameworks

- ▶ Git / BASH
- ▶ Powershell
- ▶ Docker
- ▶ CI/CD
- ▶ AWS, Azure
- ▶ Posit

Languages

French	Native
Spanish	Native
English	Fluent
German	Passive
Italian	Good

Summary

Senior R Developer specialized in R data platforms and cloud-based analytical infrastructures.

Proven experience designing, deploying, and maintaining containerized environments for regulated sectors including banking and pharmaceuticals. Strong track record in industrializing R workflows for non-technical users, ensuring platform reliability, automation, documentation, and operational continuity. Experienced with AWS infrastructures, Posit Server ecosystems, and CI/CD workflows.

Experience

Senior R Developer

02/2025 - Present

Johnson & Johnson

- Designed and maintained containerized R platforms (Docker) for Posit Server ecosystems and pharma applications
- Leading open-source R package development to accelerate insights generation in clinical research settings
- Provided platform support, automation, documentation, and incident handling in regulated environments

Data Science Consultant

01/2024 - 02/2025

Freelancer

- Developed data infrastructure solutions for multiple clients, implementing process automation and cloud-based data management systems
- Built and operated cloud-based analytical infrastructures on AWS
- Conducted complex data analysis and predictive modeling across diverse industry domains, including healthcare and financial technology

R Developer / Data Scientist

04/2022 - 01/2024

FlowBank

- Architected and operated production-grade analytics platforms based on R Shiny, Docker, and AWS
- Maintained containerized machine learning pipelines for fraud detection and risk modeling
- Managed internal data platforms used by data science teams, including job scheduling and user support
- Collaborated closely with security and compliance teams in a regulated banking environment

Lecturer in Biostatistics

09/2020 - 01/2022

University of Geneva

- Delivered statistics courses and practical workshops in R and Python
- Produced and maintained teaching material and documentation for students

Research Scientist

03/2020 - 01/2022

Novo Nordisk - Campus Biotech, Switzerland

- Developed large-scale data processing pipelines for clinical and neuroimaging data
- Applied advanced Bayesian statistical modeling and machine learning techniques
- Collaborated with international research teams and maintained rigorous data governance standards

Projects
